

Interstates offers industrial electrical engineering, construction, and control system solutions tailored to meet the needs of processing and manufacturing clients nationwide and internationally. With focus on practical, value-added constructible design, Interstates services range from pre-planning and prefabrication to installation and system start-up. Interstates also offers the design of full plant control systems, data collection, and reporting and provides the interface with existing business systems.

- Integrated Design-Build Electrical Provider
- Electrical Systems Design
- Energy & Facility Audits
- Electrical Construction Services
- Electrical Prefabrication
- 3D Modeling & BIM
- Lean/Agile Material Procurement & Execution
- Control System Design
- Control System Programming
- UL Panel Design & Fabrication
- Operational Technology Infrastructure & Security
- Data Visualization, Collection & Management
- Plant Floor Integration
- Inventory Tracking
- Cybersecurity & Disaster Recovery
- Instrumentation Design, Specify, Procure & Install
- Instrumentation Calibration/E&I Maintenance
- Installation, Commissioning & Start-up Services
- 24/7 Support Services
